Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-4 and 6-8 are rejected under 35 U.S.C. 102(e) as being anticipated by Fischell et al. (U.S. 6,190,403).

Fischell et al show in fig. 2, an expanded stent (10) with effective struts and connector patterns having all the limitations of claims 1 and 6-8, including: a multiplicity of strut members (12); Each set of strut members is separated from the other and formed a closed ring-like cylindrical section of the stent. Each strut element consists of one curved end strut that is joined at a junction point to one diagonal strut. Each set of flexible links (14,16) connects two of the multiplicity of sets of strut member. Each of flexible links is a single undulating structure that extends generally in longitudinal direction that is parallel to the stent's longitudinal axis. At least some of the individual flexible links is having a shape of a letter Z (fig. 2). Each of the links has at least two curved segments which connected to at least three straight segments (19b, fig. 3 is considered as a straight segment); and where each of the straight segments of the individual flexible links lie a long the longitudinal axis of the stent (as best seen in fig. 3)

Regarding claim 2, Fischell et al show each flexible link (14,16) has two ends that are attached to the multiplicity of strut elements (fig.2).

Art Unit: 3731

Regarding claim 3, Fischell et al show there are adjacent sets of strut members which are in phase with one another, i.e, means 21b can be considered as peaks in one ring that faces along narrow depression of 55 in the adjacent ring.

Regarding claim 4, Fischell et al show there are adjacent sets of strut members which are out of phase with one another, i.e, means that peak 21b in one ring faces peaks 24 in the adjacent ring.

Response to Amendment

2. Applicant's arguments with respect to claims 1-4 and 6-8 have been considered but are moot in view of the new ground(s) of rejection. Applicant is asked to please refer to the modified prior art rejection above where the examiner addresses applicant's concerns regarding prior art rejections.

Conclusion

3. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event,

Art Unit: 3731

however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
